How to set passwords on keypad outdoor unit

- ▲ Attention
 - 1. The default program password is 1234.

2. Each keypad door station allow 40 groups use passwords to unlock door.

3. The password to enter programming mode, we call it programming password. The password to open the door, we call it user password.

Modify the programming password

1. Power off, press * and keep holding, switch on the power.After 3 seconds, heard DiDiDi...release * button.

2. Enter 4 digits as new programming password, a long Di sound, means success. (2-6 digits allowed),the length same as original code)
3. Press * to exit.

Enter programming mode

1. Press * (a Di sound), enter 4 digits programming password(2-6 digits allowed, default programming code is 1234). After a long Di sound, it says enter the programming mode.

2. It'll exit the programming mode within 30 seconds without any operations (DiDiDiDi sound means exit).

3. Press * to exit.

Set unlocking time delay

Factory default unlock delay is 1 second.

- 1. Enter programming mode (*1234), a long Di sound.
- 2. Press 00, a long Di sound , enter 2 digits(from 01-99)as unlock time. After
- a long Di sound , it says set success.
- 3. Press * to exit.

Add user passwords

- 1. Enter programming mode (*1234), a long Di sound.
- 2. Enter 2 digits position from 01-40, a long Di sound.
- 3. Press 4 digits password(2-6 digits), after a long Di sound, means add success.
- 4. Press * to exit.

Attention:each door station keypad have 40 positions(01-40), each position allow one password.Position 31-40 cant set unlock delay, beacuse there're used for dry contact lock(NO/NC).

Delete one user password(input position)

1. Enter programming mode (*1234), a long Di sound.

2. Enter 2 digits position from 01-40, a long Di sound.

Press #, another Di sound again. means delete it.

3. Press * to exit.

Delete user password(input user password)

1. Enter programming mode (*1234), a long Di sound.

 Press # , DiDi sound, enter that 4 digits password you want to delete (can be 2-6digits). After a long Di sound, means deleting success.
Press * to exit.

Setting the length of password

1. Enter programming mode (*1234), a long Di sound.

2. Press 99, a long Di sound, then enter digits from 2-6, a long Di sound again means set success.

3. Press * to exit.

(Attention: after change length of password, all passwords were cleared out. e.g. length of password set as 3, then programming password will be 123.)

Delete all settings

1. Enter programming mode (*1234), a long Di sound.

2. Press #, DiDi sound, press # one more time, a long Di sound, press # 7 times, after 3 seconds, a long Di sound, means deleting success. After that, the unlock time delay changes to 1 second, and clear out all user passwords, but programming password no change(1234). 3. Press * to exit.

Restore factory mode

Switch off power, press # and keep holding, switch on the power. After a long Di sound, release #, means restoring success. The default programming password is 1234, and clear out all the user passwords.
